

# Data Analysis on Electric Vehicle

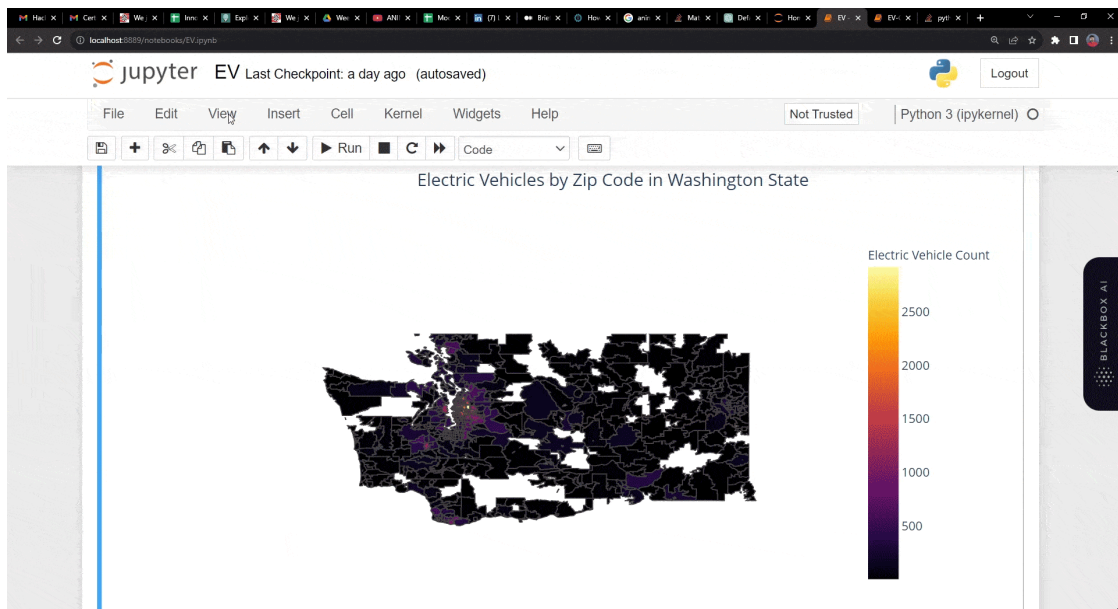

Download the dataset - [CLICK HERE](#)

**Task 1:** This is an open ended problem. Apply Exploratory Data Analysis (Univariate and Bivariate) on the dataset available above.

**Task 2:** Create a Choropleth using **plotly.express** to display the number of EV vehicles based on location.

[Click here](#) for the **Plotly** tutorial.

**Note:** Following is an example of a Choropleth animation. It might take a couple of minutes to render.

**Task 3:** Create a **Racing Bar Plot** to display the animation of EV Make and its count each year.

[Click here](#) for the Racing Bar Plot Tutorial.

**Note:** Following is an example of a Racing Bar Plot animation. It might take a couple of minutes to render.

**Task 4:** Write a LinkedIn Post which reflects your work and experience for this project. Don't forget to tag Innomatics Research Labs in your posts.
